The purpose of zoning is to locate particular land uses where they are most appropriate, considering public utilities, road access, and the established development pattern. The Zoning Map regulates allowable land uses within the City through the creation of land use districts or zones, and then assigns individual parcels to a particular zoning district. A rezoning is a change in the zoning district designation for a property. The rezoning process exists to allow property owners to change the zoning district designation of their property to another zoning classification or land development regulations which may impact property use standards.
